*Markets and Markets, November 2024

REASON TO CONSIDER

AI Infrastructure Growth

- Generative AI adoption is accelerating across industries, increasing demand for the infrastructure needed to train, deploy, and scale AI models.
- The global AI infrastructure market is projected to grow from $135.8B in 2024 to $394.5B by 2030, representing a 19.4% CAGR.*

Backbone of the AI Economy

- Rather than trying to identify which AI application, platform, or model may win, MTRX provides exposure to the companies enabling AI growth behind the scenes.
- This includes businesses involved in semiconductors, data centres, cloud infrastructure, networking, power systems, and other critical technologies.

Beyond Traditional Tech Exposure

- AI infrastructure demand extends beyond software and mega-cap technology companies, creating opportunities across hardware, energy, data, and infrastructure services.
- MTRX helps investors access a broader set of companies positioned to benefit from the physical and digital buildout required to support AI adoption.

Targeted exposure to the infrastructure powering the next phase of artificial intelligence

MTRX: Allocation Overview

A DIFFERENT KIND OF ARTIFICIAL INTELLIGENCE ETF

1. Pure “Picks and Shovels” play. Offers a complementary way to invest in AI, focusing on the utilities, energy, and resources that keep the AI economy running.

2. By equally weighting across power infrastructure, raw materials, and data centers, MTRX provides a balanced portfolio of the three most essential inputs for scaling AI.

3. MTRX positions investors in the enduring growth story of AI infrastructure rather than the volatility of application software or chip cycles.

*Global X ETFs forecast as of Sep 19, 2025 with information derived from: Broadcom, Mar 2024; Bloomberg, Jan 2025.

REASON TO CONSIDER

Structural Growth in AI Infrastructure

- AI Semiconductor spending is projected to exceed **$520B by 2030***
- Rapid adoption of generative AI, cloud computing, & data centers is driving demand for advanced chips

Accelerating Demand for AI Hardware

- AI applications require increasing compute power, memory, and interconnect capacity
- Networking and high-bandwidth memory markets expected to experience significant long-term growth

Concentrated Exposure to AI Leaders

- Focused portfolio of approximately 20 leading companies tied to the AI semiconductor ecosystem
- Captures both infrastructure builders and service providers across multiple segments

Targeted exposure to the companies powering the next generation of AI computing infrastructure

CHPS: Allocation Overview

THE FIRST DEDICATED AI SEMICONDUCTOR ETF IN CANADA

1. Direct access to one of the fastest-growing, strategically critical technology sectors.

2. Diversified access to the backbone of AI innovation across the entire AI semiconductor ecosystem — from design (fabless, IP & EDA) to manufacturing (equipment, foundries, packaging & testing).

3. Access some of the world's largest and most influential semiconductor leaders, all through a U.S. listed, transparent, rules-based index.

REASON TO CONSIDER

High Growth Potential

- Forecasts suggest the global AI market could increase more than 300x from $39bn in 2022 to $1.3tn by 2032.*

Rapid Commercialization

- AI is quickly expanding beyond data centers, enabling innovative commercial applications in diverse sectors, including Agriculture, Health Care, and beyond

Unconstrained

- AI spans multiple segments, and its most innovative companies include both household names and newcomers from around the world.

AIQ: Allocation Overview

PROVIDING EXPOSURE TO THE INDXX ARTIFICIAL INTELLIGENCE & BIG DATA INDEX

1. Explore the best of tech. Exposure to companies involved in the development of Artificial Intelligence Software, AI-as-a-Service (AIaas), AI Hardware & Quantum Computing.

2. Exposure to the AI value chain providing access to companies at the forefront of AI innovation.

3. Unconstrained approach that diversifies its exposure across a variety of sectors and geographic regions.

REASON TO CONSIDER

Exposure to Robotics & AI

- RBOT provides exposure to global companies involved in robotics, automation, artificial intelligence, and enabling technologies used across industrial and non-industrial applications.

Adoption Across Industries

- Robotics and AI are expanding beyond traditional manufacturing into areas such as logistics, healthcare, agriculture, defence, consumer technology, and enterprise operations

Improving Economics

- As robotics technology scales and hardware costs decline, automation is becoming more accessible, helping support broader adoption across companies and industries

Targeted exposure to the technologies reshaping how industries operate

RBOT:
Allocation Overview

PROVIDING EXPOSURE TO THE INDXX GLOBAL ROBOTICS & ARTIFICIAL INTELLIGENCE THEMATIC INDEX

1. Specialized global equity exposure to companies actively disrupting fields like automated manufacturing, machine vision, and medical robotics.

2. Tracks specialized benchmark designed exclusively to capture market leaders advancing the commercial development and physical deployment of automated technologies.

3. Geographically diversified to capture growth as countries such as the U.S., Japan, and China compete to advance robotics, AI, and advanced automation technologies.

Global X Space Tech Index ETF
ORBX

ORBX at a Glance

ETF Name	Global X Space Tech Index ETF
Ticker	**ORBX**
Index	**Global X Space Tech Index**
Management Fee[1]	0.49%
# Holdings[2]	28
Geographic Exposure	Global
Currency Exposure	CAD
Risk Rating	High

[1]Plus applicable sales tax.
[2]As at May 31, 2026. The number of holdings may vary based on index eligibility criteria and rebalancing.

REASON TO CONSIDER

Structural Growth in the Space Economy

- The global space economy is project to surpass $1 trillion by 2034*
- Shift from government-led programs to private sector commercialization and falling launch costs

Explosive Growth in Satellite Demand

- Satellites are powering broadband, GPS, AI data, and communications
- Estimated growth from ~15,000 today to 100,000 by 2030*

Exposure to the Full Space Value Chain

- Includes rocket launch, satellite systems, components, and data services
- Captures both infrastructure builders and service providers across multiple segments

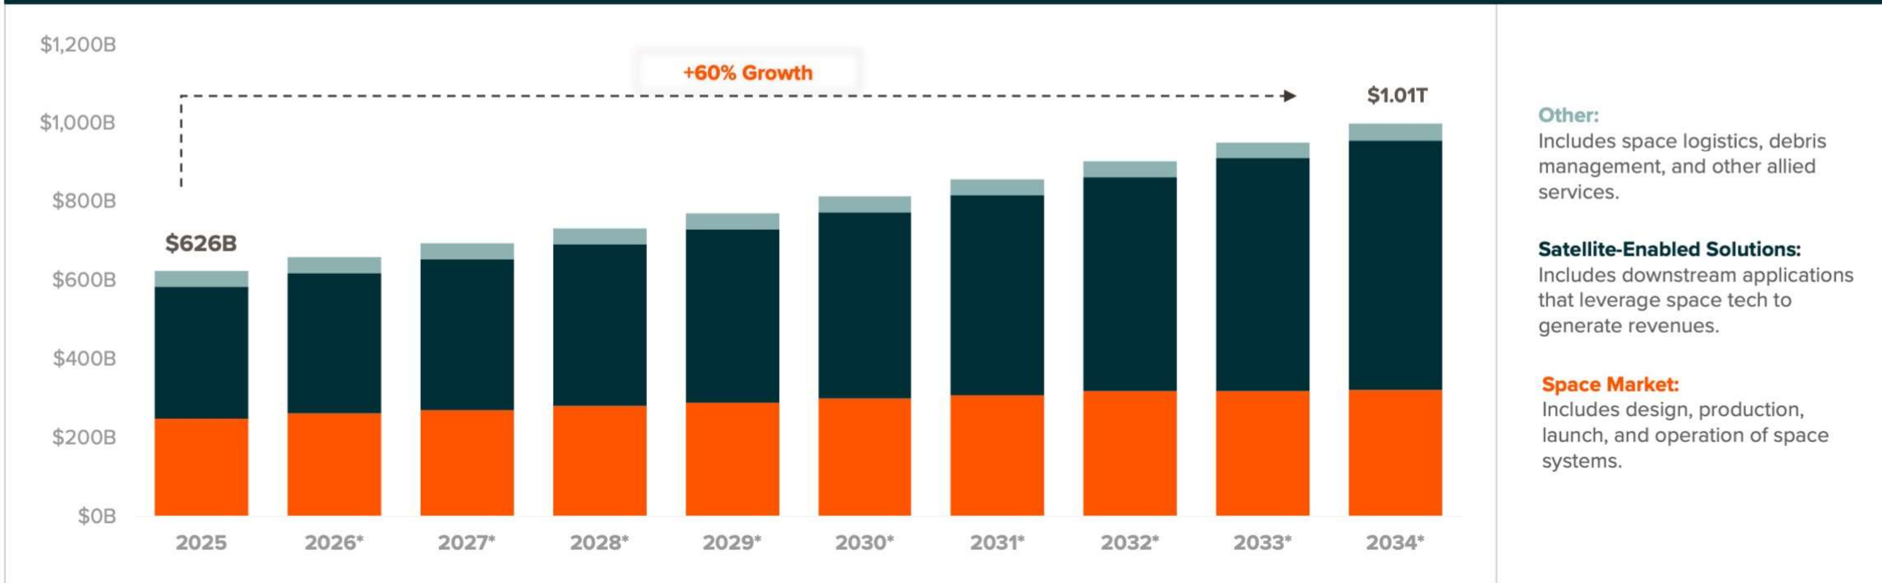
Targeted exposure to one of the fastest growing frontiers in technology and innovation

*Forecast
Sources: Novaspace. (2026, Jan). The Space Economy Report.; RHS: European Space Agency. (2025, Jan 4). Around 100000 Satellites Are Expected to Be in Orbit by 2030.; Statista. (2025, Jan). Number of Active Satellites from 1957 to 2024.; Jonathan's Space Report. (2026, Mar 18). Satellite Statistics: Satellite and Debris Population.

Space is Moving From Frontier Technology to Critical Commercial Infrastructure

As launch costs fall and satellite services scale, the commercial space economy is becoming broader, more investable, and more economically relevant, shifting Space from exploration to core infrastructure for the modern economy.

Global Space Economy Projected to Top $ 1 Trillion by 2034, with Downstream Satellite -Enabled Solutions Driving Growth



*Forecast. Sources: Chart: Novaspace. (2026, Jan). The Space Economy Report.

Top 10 Concentration

Portfolio Highlights

- Focused on high-growth companies driving the space economy
- Exposure across the full space value chain
- Strong U.S. base with global end-market exposure
- Positioned for long-term growth in connectivity and space commercialization

Disclaimers

Commissions, management fees, and expenses all may be associated with an investment in products (the "Global X Funds") managed by Global X Investments Canada Inc. The Global X Funds are not guaranteed, their values change frequently and past performance may not be repeated. Certain Global X Funds may have exposure to leveraged investment techniques that magnify gains and losses which may result in greater volatility in value and could be subject to aggressive investment risk and price volatility risk. Such risks are described in the prospectus. The Global X Money Market Funds are not covered by the Canada Deposit Insurance Corporation, the Federal Deposit Insurance Corporation, or any other government deposit insurer. There can be no assurances that the money market fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the Funds will be returned to you. Past performance may not be repeated. The prospectus contains important detailed information about the Global X Funds. **Please read the relevant prospectus before investing.**

Certain ETFs are alternative investment funds ("Alternative ETFs") within the meaning of the National Instrument 81-102 Investment Funds ("NI 81-102") and are permitted to use strategies generally prohibited by conventional mutual funds, such as the ability to invest more than 10% of their net asset value in securities of a single issuer, the ability to borrow cash, to short sell beyond the limits prescribed for conventional mutual funds and to employ leverage of up to 300% of net asset value. While these strategies will only be used in accordance with the investment objectives and strategies of the Alternative ETFs, during certain market conditions they may accelerate the risk that an investment in ETF Shares of such Alternative ETF decreases in value. The Alternative ETFs will comply with all requirements of NI 81-102, as such requirements may be modified by exemptive relief obtained on behalf of the ETF.

Mirae Asset Global Index Private Limited (an affiliate of the Manager) owns all rights to the trademark, name and intellectual property associated with the Underlying Indices of the Index ETFs (in this disclaimer, the "Mirae Asset Indices").
