

Protecting your wealth in a digital world

At RBC Wealth Management, protecting our clients' information and safeguarding systems is a top priority. Our global cybersecurity team is committed to upholding and enhancing the safeguards required to protect you from cybercrime, so you can feel confident and secure.

Investing in cybersecurity teams and programs

With over \$5 billion in annual technology spend, we take a proactive approach to cybersecurity—combining cutting-edge technology, expert oversight and continuous monitoring to keep your data and accounts safe. Here's how we do it.

<p>1000+ cybersecurity professionals use cutting-edge technology to help protect our clients</p>	<p>12% growth in cyber investment since 2019</p>
<p>Ranked Safest Bank in North America <i>Global Finance World's Safest Banks Awards (2025)</i></p>	<p>Best Private Bank for use of technology in Canada <i>PWM Wealth Tech Awards (2026)</i></p>

- Development and retention of highly trained global security teams that work to protect your data against threats 24 hours a day, 7 days a week
- Deployment of evolving authentication methods—including biometrics and multi-factor—to ensure only the right people access your accounts
- Investment in next-generation tools like AI, machine learning and quantum computing to stay ahead of emerging threats
- Utilization of encryption technology to secure online transactions and protect sensitive information during online banking sessions
- Our cybersecurity program is aligned to the National Institute of Standards and Technology Cybersecurity Framework—and goes beyond its best practices to protect the security of client data

As a client of RBC Wealth Management, you can be confident that RBC is working to safeguard your data and assets against cybercrime—today and in the future. If you have questions or concerns, please speak to your advisor.
